Our Product Introduction

Product Description

Household Food Waste Disposer: The Cleaning Guard of the Kitchen

Nowadays, the household food waste disposer has become an important role in the kitchen.

Its appearance is usually fashionable and novel, small and exquisite. Whether it is a compact small kitchen or a spacious large kitchen, you can easily find a place for it.

Its working principle is based on efficient decomposition or grinding technology. Decomposition-type food waste disposers use special enzymes and microorganisms to convert food waste into harmless substances; grinding-type disposers grind food waste into tiny particles through high-speed rotating blades.

The use of the household food waste disposer is extremely convenient. You just need to pour the food waste in, start the switch, and it will work quickly and quietly.

The advantages it brings are significant. It greatly reduces the volume and weight of kitchen waste, reducing the space occupied by the trash can. At the same time, it effectively inhibits the breeding of bacteria and pests, ensuring the hygiene and safety of the kitchen.

For example, in the humid rainy season, food waste is no longer prone to mold; for families with children, a clean kitchen environment can make children grow healthier.

The household food waste disposer guards the cleanliness and health of your kitchen.

Product Specification:

Model	FW300-A3
Sound Level	<=55 dB(A)
Power	500 W
Capacity	2.5L
Product size	L367*W255*H346mm
Filter	Activated Carbon

Product Features:

* Turn your waste to fertilizer by 2-4 hours

- * Transparent Glass Cover, check the residue conversion status at any time
- * Drying-Grinding-Cooling, three steps reduce volume of your waste by up to 95%
- * Activated carbon filter remove smell
- * Fashion design makes it great to fit your countertop
- * One button start, auto adjust the working time according to the water content of your waste.
- * 2.5L capacity enough to cover your whole family food waste for one day

Food Waste Disposer Principle:

Operation Process

04

Crush the hard bones

Smash to pieces

High efficiency dehydration

Drying and deodorizing

1.Kitchen junk fruits and vegetables peels and bones
